

USER GUIDE

LE-316

Twin Star **ODYSSEY**

Thank you for choosing Odyssey Lighting. This lighting effect features preinstalled lamps and is ready to be used.

IMPORTANT!

Please read this User Guide before attempting to operate unit.

OPERATING INSTRUCTIONS

This unit is ready to be used. Multi-colored beams will react to audio (bass) sounds in music via the internal microphone. Adjust the sensitivity knob to make your effect less or more sensitive to audio. Make sure the effect is installed and operated in a well ventilated area with fan vents clear of obstacles. For the ultimate effect, fog or haze must be used in order to see the colorful beams. Although the unit is fan cooled the duty cycle must be applied.

CAUTION

The lens dome will get extremely hot during normal operation of unit. Please use a 10 min. on & 10 min. off duty cycle for best operation and longer unit life. After operation allow sufficient time to cool down before handling or moving the unit.

IMPORTANT!

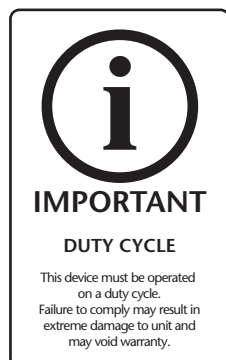

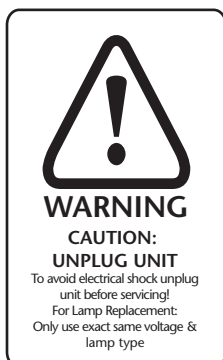

Never open the unit when in use. Always disconnect the power cord from the power source when replacing lamps or servicing the unit. Always replace fuses and lamps with the exact same type.

LAMP REPLACE

Unscrew the top bracket from the main body of the unit. Gently remove the old lamp(s), Then, using a clean cloth or glove, carefully insert the new lamp(s) into the ceramic socket(s). NEVER TOUCH A NEW LAMP WITH YOUR BARE HANDS OR FINGERS (oil and dirt on your skin will damage the bulb).

TROUBLESHOOTING

1. If the effect does not turn on	a) try plugging into an outlet you know is working. b) check fuse & make sure it is not blown
2. If the lamps are on but there is no movement	a) check sensitivity knob - turn knob clockwise (right) while music is playing (make sure there is plenty of bass in the music).

<i>Specifications</i>	
Beam Spread:	Dual
